# Move your goods with Lödige Lift Solutions

## LÖDIGE LIFT SOLUTIONS SAFE SOLUTIONS FOR VERTICAL MOVEMENTS

We are committed to delivering innovative lift solutions that make a significant impact on our customers' business. Our heavy-duty lifts are the perfect solution for various buildings: factories, storehouses, parking centres, hospitals, supermarkets or shopping centres, where they are ideally suited for moving large, bulky items. Furthermore, they can easily be customised to any building requirements and prove to be a game-changer for many customers.

OVERVIEW OF OUR SOLUTIONS:

**SHERPA® GOODS ONLY LIFT**  
Ideal for transporting goods up to 4,500 kg in storage and production areas.  
> Page 06 - 07

**ESCORTA® GOODS LIFT**  
ESCORTA is a perfect solution for transporting goods up to 4,500 kg. It offers an additional benefit of multi-passenger transportation.  
> Page 08 - 09

**OLYMPUS HEAVY GOODS LIFT**  
Standard goods lifts for loads up to 20 t. Higher lifting capacities are available on request.  
> Page 10 - 11

**CAR LIFTS**  
Flexible solutions for the transportation of vehicles over several levels.  
> Page 12 - 13

**ELEGANCA PASSENGER ELEVATOR**  
A flexible solution for passenger transportation, which can be easily installed in all types of buildings. Perfect combination of style and functionality.  
> Page 14 - 15

**SERVICE | 24/7 REMOTE ASSISTANCE**  
Worldwide local service for individual machines or complete systems. Backed up by Lödige's 24/7 Remote Assistance.

## HEAVY-DUTY SOLUTIONS FOR EVERYDAY USE DIVERSE LIFTING OPTIONS

As specialists in elevator technology, we develop advanced solutions for conveying passengers, cars and goods in the field of vertical transportation. Our standard and tailor-made solutions are used in industry, trade and logistics, as well as by building operators and public sector bodies. Using highly efficient technology, we manufacture elevators that feature a convincing and high level of reliability and which are in demand in a variety of industries.

# PRACTICAL. EASY. RELIABLE. SHERPA® GOODS ONLY LIFT

Our SHERPA® is the optimum integration solution for transporting goods in an industrial environment. Due to the minimal pit depth required and tailor-made cabin dimensions, it can easily be installed into existing buildings or rack systems without undergoing any modifications. Thus the installation process is fast and easy.

## SHERPA®

Passengers allowed	No
Max. load capacity	4.5 t
Max. lifting height	18 m
No. of stopping points	2 to 6

### SHERPA® NOW DOES EVEN MORE

EXTENDED CABIN AND NOMINAL LOAD OPTIMIZE FLOW OF GOODS AND INCREASE SCALABILITY

With an increased nominal load of up to 4.5 tonnes and a larger cabin, it is now ever easier to transport heavy and bulky loads while retaining the advantages of the compact machine room-less solution with self-supporting steel frame shaft. The latter is now also available powder-coated in classic RAL colours. For nominal loads from 3 tonnes, installation in existing concrete or masonry shafts is also possible.

Meeting customers' needs has always been our priority. We work closely with our customers to perfectly understand their expectations and requirements. Therefore, we always take the planned lift application into consideration and extend our flexibility to design and offer fully customised cabin sizes.

# GAME-CHANGER FOR YOUR BUSINESS ESCORTA® - GOODS LIFT WITH MULTI-PASSENGER TRANSPORTATION

Lödige goods lift ESCORTA® is certified to carry goods together with multiple passengers. This upgrade option increases the level of comfort, making transporting goods between levels much easier and more pleasant.

**NEW!**  
ESCORTA NOW IN XXL TOO!

Like the SHERPA®, the ESCORTA®, with its new maximum load capacity of 4.5 tons, the ESCORTA® enables the transport of heavy and bulky loads with accompanying persons.

Like our goods only lift, ESCORTA® is a sturdy and reliable goods lift which offers a high level of flexibility. Thanks to the free-standing shaft, the lift can easily be integrated into existing buildings. No special civil works (pit) or building works (separate machine room) are necessary. This allows ESCORTA® to be installed in virtually any application.

To maximise flexibility in design, we give our customers the opportunity to configure ESCORTA® individually according to their needs and planned lift application.

## POWERFUL WORK ASSISTANT OLYMPUS HEAVY GOODS LIFT

The installation locations and applications of good lifts are as varied as the requirements they have to meet. Most of these requirements can be met with Lödige goods lifts, which are perfect for storage and production facilities and can be customised to the special requirements of the client.

### OLYMPUS

Passengers allowed	Yes
Max. load capacity	20 t
Max. lifting height	24 m
No. of stopping points	2 to 12

*Customised goods lift, electrical appliance manufacturer*

The combination of reliable basic equipment and sophisticated technology makes these lifts trustworthy assistants for everyday work. Lödige supplies a wide range of 10 powerful goods lifts, which differ in load capacities, cabin and door measurements. Up to 8 floors can be reached and up to 15 t can be lifted with these standard goods lifts.

Thanks to the modular design, different configurations can be implemented depending on the application and structural conditions.

*OLYMPUS, manufacturing company*

We perfectly understand the variety of needs our customers may have. We want to be a partner for implementing new industrial solutions. Therefore, we are always ready to listen, work together and help companies to improve their performance with Lödige solutions. So although we specialise in standard machines, we offer also customised versions of our OLYMPUS (various capacities, sizes and lifting heights).

## VERTICAL MOBILITY FOR YOUR CAR LÖDIGE CAR LIFTS

In view of growing urban centres and therefore limited space for parking, we can provide car lifts as a means of travelling comfortably to underground/above ground parking areas. As a result, our solutions make city life much easier.

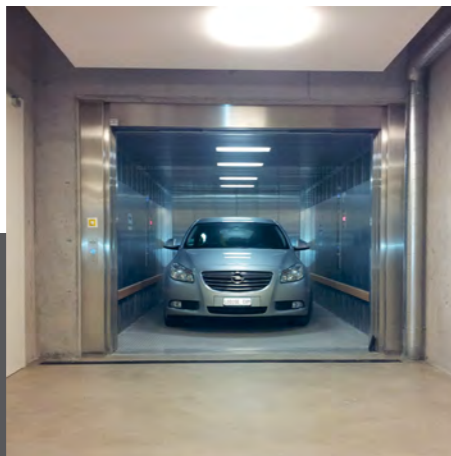

### CAR LIFTS

Passengers allowed	Yes
Max. load capacity	4.85 t
Max. lifting height	24 m
No. of stopping points	2 to 8

TRAFFICO® car lift,  
private building

Our lifts can be not only customised but also perfectly integrated into new and existing buildings. We take into account your individual needs and develop space-saving and secure solutions for both indoor and outdoor use

Lödige car lifts enable cars to be transported vertically in a safe and simple manner. These solutions help to avoid space-consuming, expensive ramps. They provide high levels of flexibility and can be used for transportation up to 24 m. Lödige car lifts allows utilisation unused underground space, which is an increasingly important benefit in towns and cities.

configurations

ELEGANCA,  
special design

High riding comfort and numerous configuration options are just some of the features our customers always appreciate. Thanks to the variety of models, we are always able to offer the right solutions, whether a new or existing building is concerned.

Our team works closely with you to make sure that all your expectations are fulfilled. Last but not least, once the elevator is delivered and installed, we are able to provide a full service maintenance agreement.

Let us build a long and successful relationship!

## LONG-TERM SYSTEM RELIABILITY AT THE LOWEST COST LÖDIGE SERVICE

Due to our many years' experience and our local presence, we perfectly understand your technology needs. As part of our service, we offer individual maintenance for stand-alone systems as well as for complex automated systems. This ensures the reliable operation of your systems at the lowest possible cost.

© DOKK1 Aarhus | Mathias Sandmann

### Maintenance

The modular design of our maintenance agreements provides you with long-term reliability at the lowest cost.

### Customer advice

We provide expert advice on the current condition of your systems and potential for improvement with regard to technology, throughput and operation.

### Spare parts and repairs

Our international service network guarantees rapid assistance should repairs be necessary.

### Modernisation

When it comes to converting or modernising your systems, our service teams can provide numerous options for upgrading your systems to the latest technical standards.

### 24/7 remote-control service

In order to reduce the cost of local service monitoring and to increase system availability, Lödige Industries offers 24/7 remote monitoring for automatic parking systems. Errors in the system can be detected quickly via remote diagnosis and in many cases corrected directly from the control centre without having to resort to a local technician.

Control room for 24/7 remote assistance

Our international service network allows us to react quickly when a problem occurs. This also applies to systems delivered by other manufacturers.

Over time, the requirements on the machine or the system change. We are happy to assist you in expanding your system or changing to new technologies. We have extensive experience in scaling up and modernising system, even during normal operation.

## WHY LÖDIGE? EASY SOLUTIONS FOR HEAVY GOODS

- **Experience** - since 1948 we have been amassing expertise while helping companies from a wide range of industries.
- **Maximum quality** - our customers' satisfaction being our top priority, we always aim to achieve maximum quality..
- **Economical and reliable solutions** - we focus strongly on making systematic use of synergies and enabling consistent exchange of knowledge within the company to provide extremely economical and reliable solutions.
- **Global network of regional locations** - thanks to our worldwide presence you can always access our pooled expertise.
- **Follow-up support** - our bespoke maintenance services guarantee that your systems operate reliably at the lowest possible cost.
